PROFESSIONAL SUMMARY

Third-year IT student at MIT Manipal with hands-on experience in strategic partnerships, financial operations, and cross-functional team leadership. Proven ability to manage end-to-end BD cycles, negotiate high-value MOUs with global brands, and translate stakeholder needs into structured deliverables — directly applicable to B2B product management in an Agentic AI/FinTech environment. Deeply curious about AI-driven workflow automation and its potential to transform enterprise finance operations.
